## Cunningham Elementary, Landscape Master Plan

Cunningham Elementary was a recipient of a grant for campus improvement. Vista was contacted by the principal to create a landscape master plan for the school but Vista's approach was to organize a series of workshops and involve the students in creating their own master plan based on their personal experiences. Beginning with explanations of "landscape architecture" and discussions regarding their day to day personal routines and experiences. Then proceeding out around the campus for photo documentation and applying the photos to maps. The final session to date was a mapping exercise with the students making notes all over the maps. The project is on hold until school resumes in the Fall and the new student council is in place.
